PROFESSIONAL EXPERIENCE

Senior Programmer Analyst

CAI-STA Philippines, Inc.

2017 to present

Worked on a proprietary origination platform used by a mortgage services company to support home loans, refinancing, and custom lending products.

- Provided production support by analyzing, debugging, and resolving system defects
- Refactored legacy code to improve system performance, maintainability, and scalability
- Designed and developed restful APIs to support system growth and integrations
- Handled system integration with third party platforms and services
- Modernized internal tools by updating and containerizing applications
- Developed and executed unit test plans to ensure system stability
- Performed code reviews and enforced coding standards across the project

Junior Software Analyst

GDS Link Asia, Inc. (2016 to 2017)

Contributed to a property valuation system that aggregates data from multiple sources. Implemented features and supported production systems.

Web Developer Intern

Taughtworks, Inc. (2015)

Worked on a legislation management system under tight timelines.
